

Stepping up Europe's 2030 Climate Ambition

Agriculture and land

Simon Kay, DG CLIMA 10 Feb 2021

Towards a climate-neutral EU by 2050

- Proposal 4 Mar 2020, **Climate Law**: to enshrine this EU target legally. It established a pathway to climate neutrality by 2050.
- Proposal 17 Sep 2020, **Climate Target Plan**: EU economy-wide greenhouse gas net reduction target of ***at least 55% by 2030***, compared to 1990
 - Both including net emissions ***and*** removals of **GHG on land** (land use, land use change, agriculture, forestry, settlements, etc.)

Key questions, land

How to set ambitious
and credible targets for
LULUCF and
agriculture?

How to bring better
incentives to farmers
and foresters and
create a better
activity/business model
for them?

Over-arching policy frameworks

Recovery and Resilience Facility

2030 Climate target plan

Production-oriented strategies

Farm-to-Fork Strategy

Biodiversity Strategy

Forest Strategy

LULUCF Regulation

Carbon removal certificates

Carbon farming /
Wood construction material

EU-wide standards for
carbon removals

Voluntary and regulatory
carbon markets

Demand-oriented strategies

Renovation Wave

Construction products
Regulation

Circular Economy Action
Plan

Bioeconomy Strategy
